Invisalign Clear Aligners at Lakes Dental

Invisalign at Windermere

If you're in need of teeth straightening treatment but are concerned about the aesthetics of wearing braces then at Lakes Dental we can help. We offer the latest in discreet adult orthodontic treatments such as Invisalign.

In a similar manner to conventional braces, Invisalign corrects the positioning of crooked, angled or gappy teeth using gentle pressure which is applied gradually over time. Unlike conventional braces, Invisalign uses a series of removable aligners or trays manufactured from clear plastic, that are worn over the teeth rather than fixed to the teeth to give the desired results. Invisalign aligners are suitable for people of all ages and are both comfortable and versatile.

Invisalign Benefits

Virtually Invisible

- You can straighten your teeth without anyone knowing

Removable

- You can eat & drink normally
- You can brush & floss normally to maintain excellent oral hygiene

Comfortable

- There are no metal brackets or wires causing mouth irritation
- You spend less time in the dentist's chair having adjustments

We Love To Make You Smile

Step 1- Have a Consultation

Once we have determined that Invisalign is the right treatment solution for you we can begin the process of formulating your treatment plan.

We will create a digitally formulated treatment plan showing you a 3D simulation of your teeth, before, during and after your treatment. This is called a ClinCheck. This allows you to visually see how your smile will transform over the course of treatment, finishing with your beautiful new smile.

Step 2- Wear your Aligners

In the consultation we will take impressions of your teeth and the laboratory will make your custom aligners.

We will give you a series of aligners to wear every day and to change at home (on average 1-2 weeks as directed by your dentist)

Step 3- Monitor progress

We will ask you to visit us around every 4-6 weeks to check your progress and give you the next series of aligners.

Step 4 - Enjoy your smile

You won't be able to stop smiling! We will conclude your treatment and make you custom made Vivera retainers to wear at night to maintain your new smile.

Frequently Asked Questions

Q How long does Invisalign take to straighten your teeth?

A *Depending on the complexity of your case, you could complete your treatment in as little as 6 months. But you'll start seeing results in a matter of weeks.*

Q Since having my braces removed, my teeth have shifted. Can Invisalign treatment fix this?

A *Yes, Invisalign clear aligners can treat nearly all common teeth-straightening issues, from simple to complex. Many people who formerly had braces choose Invisalign treatment as the discrete solution to improve their smile when they find that their teeth have shifted back.*

Q What are Invisalign clear aligners made of and what do they look like?

A *Invisalign clear aligners are made of flexible plastic – specifically, a patented thermoplastic material called SmartTrack created exclusively for Invisalign Treatment.*

Q I have veneers or crowns. Will Invisalign clear aligners work with them?

A *It depends. Talk with your doctor about the dental work you've had done, including veneers and crowns, and he or she will evaluate your individual needs.*
